# Industrial Parts Washing Machine

Garage Technic is the manufacturer of Industrial Parts Washing Machines in Konya, Turkey. The Parts Washing Machines are especially suited for metal cleaning, metal finishing and metal treatment with hot water and cleaning detergents. We are designing and manufacturing superior quality and latest technology of stainless steel machines.

Industrial Parts Washers can be used for metal cleaning, degreasing, pickling, phosphating, lubrication, passivation, corrosion protection, stripping, pre-painting, etc...

## The Main Sectors for parts washing machine:

- Automotive services and garages
- Truck, Bus, Tractor, Construction Machinery services and garages
- Engine replacement and rectifying
- Machined metal parts cleaning
- Auto spare part cleaning
- Mould cleaning
- Cast cleaning
- Cleaning before coating and painting
- Sintered and powdered metals

## We use friendly technologies for the environment.

- The cleaning liquid can be used for several working cycles until it becomes an ineffective cleaner.
- Every cycle runs in a closed loop without drainage and don't give liquid to outside.
- Working place remains clean.
- The waste cleaning liquid can be collected in the barrels or in sewage lagoons to protect environment.

Garage Technic parts washing machines have 650 mm to 2300 mm length, 350 mm to 700 mm height and 150 to 1000 kg loading capacity with our 8 standard machine model.

We look forward to working with you to design an industrial parts washer suited to your industrial cleaning needs. We invite you to take a moment to review the many industrial part washer machines that we have. We are dedicated to providing the best possible solution for your parts cleaning needs. We are here to assist you.
